NON-MAGNETIZED
www.lifepowerwater.com WATER

**It is not a magnetized water.
There is no magnetic force.**

All water on earth is collectively called "Magnetized water"

What is a Non Magnetized Water?

Non-magnetized water is 3 to 4 times smaller than water molecules in tap water.

Type of water	Herz
Tap water	141~146
Lourdes Springwater, France	55
Non-magnetized water	41~46

Non-magnetized water has high oxygen content.

If there's a lot of oxygen in the drinking water, it will effectively remove the active oxygen that carries toxin out of the body.

Type of water	Dissolved oxygen content
Tap water	5~6 ppm
Groundwater, Waterfall	6~7 ppm
Fresh water	9~10 ppm
Non-magnetized water	12~14 ppm

Non-magnetized water brings a healthy life

You will experience changes in the body just by drinking 3 to 4 liters a day. The principle is that non-magnetized water easily penetrates into the cell's nucleus (heart of the cell) over 60 to 100 trillion per cell.

- Removes foreign substances in the blood vessels, blood clots, waste products, and helps to treat the causes of adult diseases such as hypertension and stroke.
- Non-magnetized water smoothly supplies more than

80 minerals to cell's nucleus, thereby regenerating the skin and strengthening the elasticity of skin and blood vessels to help prevent aging.

- Helps eliminate the cause of diabetes.
- Skin that is injured, inflamed or atopic can quickly recover.
- It supplies the immune substances contained in the food to the whole body smoothly throughout the blood stream.

Non-magnetized water has amazing cleaning and washing effect

Typical water will last few days causing water to become slippery, smelly and decay as the color changes. Non-magnetized water with an antibacterial power of 92% does not change for more than 3 months because bacteria can not multiply. If you clean with non-magnetized water, it keeps bathtubs and toilets clean for a long time. If you wash with non-magnetized water, you will get an antibacterial effect. White laundry becomes whiter, and colored laundry becomes clearer.

Non-magnetized water makes plants grow very well

- Plants grown on a farm with non-magnetized water have three to four times more in nutrients.
- The flowers and trees in the garden that have been tended to with non-magnetized water are abundant and healthy.

Non-magnetized water is environment friendly.

**Excellent wash ability
with water saving effect
and dyeing effect on
environmental pollution
and economic problems**

- Reduces the use of detergents, one of harm causes to the environment, by approximately 70 to 80%.
- Non-magnetized water which flows to the drain into the septic tank through the pipe, reduces the smell of the sewer.
- The life of piping is two to three times longer, which saves piping construction costs.

The non-magnetic filter is semi-permanent

- It does not use electricity.
- Filter does not need to be replaced.
- No repairs required.
